**Introducing the new EAZE OFF™ Stainless Steel EZ4SS - 2/1/2024
Remote controlled electric hoist for overhead rail transport systems.**

The **EAZE OFF™**, designed to replace spring operated "carcass drops" currently in common use, increases production, eliminates most maintenance costs and requires practically no effort to operate safely.

- ✓ **Built to your custom specifications**
- ✓ **Heavy duty hoist motor and gearbox (2000 lb. capacity)**
- ✓ **Increased production / Automatic load or unload to or from rail**
- ✓ **Safer / No more lifting / More controlled drop**
- ✓ **Low maintenance / Less downtime / Built to last**
- ✓ **Easily replace spring operated dropper, installs with just three bolts**
- ✓ **The EAZE OFF EZ4SS features a frame, spool and wheel stop fabricated from 1/2" Stainless Steel, no rust or corrosion**
- ✓ **Dacromet coated carbon steel (recommended) or Stainless steel chain**
- ✓ **Choose standard 8 ft. wired remote or add wireless remote**

Standard drop of 7.5 feet accommodates top rail height of up to 14 feet.

Custom drop length available.

Mounts to standard 1/2" x 2 1/2" rail with three supplied stainless steel bolts and nuts.

An ANSI #40 stainless steel roller chain is used which requires trolley wheel opening of .658 inches.
