

EAZE OFF OPERATION

(Do's and Don'ts)

1. Do lower up to 1,000 lbs. from overhead rail.
2. Do raise up to 350 lbs. (750 lbs. with HD option) on to overhead rail.
3. Do bag the wired or wireless remote control daily! (see the bagging procedure sheet).
4. Do clean chain of debris and excess grease.
5. Do replace the torque reduction spring yearly.
6. Don't run your EAZE OFF™ chain back up in forward (down) direction.
7. Don't repeatedly rocker the Up/Down button on the remote control.
